Greetings Hollywood 4WRD,

See email below from LAHSA. This is a very important part of the process in preparing for the January homeless count. There are parts of the Hollywood area that may not have been fully counted in the past, due to safety concerns for the volunteers. LAHSA is trying to anticipate these "hot spots" and can make arrangements to have a law enforcement escort or other supports, in order to ensure we have the most accurate count possible.

Can I count on someone knowledgeable about the hot spots in our community to attend this meeting on our behalf? This would most likely be someone involved in street outreach, youth outreach or law enforcement.

Also, if you have specific input about nooks and crannies of our area that could be considered hot spots, please communicate directly with Jon Hans – his contact information is below.

Kerry

Hi Kerry!

Hope this finds you well. Can forward this email to everyone you think it would apply to at Hollywood 4wrld? These mapping sessions are a great resource for everyone involved and we have a great GIS mapping guy on staff who will distribute maps to everyone in attendance. Here's the info below-

**This event is taking place November 24th from 10-12 at 811 Wilshire Blvd., 6th Flr. Conference Room 1, Los Angeles, CA 90017.**

Good Afternoon,

As part of the planning and coordination of the 2016 Homeless Count, LAHSA is organizing Hot Spot Mapping and planning sessions within each Service Planning Area. The purpose of these sessions is to identify and inform areas that we know to be densely populated with people experiencing homelessness and to identify areas that we know might be safety concerns whether it be environmentally or otherwise. We are asking for known locations for these within each respective SPA.

After the session, all of the information and data provided will be compiled and mapped by LAHSA's GIS team and then disseminated out to all who participate. This process will serve to inform planning around the count in your area to make this year's count the most successful event yet and to lay the groundwork for future years as we move to an annual count.

The details for the meeting are below. If you have any specific questions, please reach out to your Regional Coordinator, Jonathan Hans at 213.347.9689.

Thank you in advance! We hope to see you there!

Jonathan Hans
